

The Federal Communications Commission

Dear The Federal Communications Commission,

If you're hurting for money so badly why don't you go after the individuals that scam us on phone services??!!! AT&T and other companies should be charged high penalties for letting scam companies bill through them!!!! I no longer have long distance service because of a scam ran through my phone lines. On a day when no one was at home my long distance was charged over \$75 for a call to Europe. AT&T did nothing about this scam and refuses to delete it from my bill. If you need money so badly fine AT&T for all the illegal monies they collect for scammers!!!!!!!!!! Or maybe I should just sue you for allowing these large corporations to continue to take advantage of the average person.

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Jennifer Ducey
